What are the differences between Kies and Kies Air?

Note: The content represented here is for **Kies PC version 2.6** and **Mac version 3.0**.

To verify your Kies software version click **Help/Information > Kies Information**.

Visit the **Kies website** for more details.

Kies and Kies Air are versatile tools that let you synchronize your personal data between your mobile device and your computer, easily add multimedia files to your device, and manage your device through an easy-to-use computer interface. Kies is a free software program for your Windows® or Mac® computer, while Kies Air offers the convenience of wireless, browser-based management that's not tied to a single computer.
